Subject: RE: Tower Standard/Haskell Lake well placement discussion-tech group

Dave,

Thank you for the information. I appreciate the update. I am also glad to hear that the property owners have agreed to installing wells as part of the investigation.

However, I would characterize the first bullet of your list differently- we at EPA have proposed locations and provided some justification, but we don't consider those locations approved. We had hoped to reach consensus on locations after we had a discussion with everyone.

I understand your deadlines and the difficulty in scheduling at this time of year. I hope we can still have wells installed before the weather causes significant problems.

I will keep the group informed as soon as possible of any updates from us.

Thanks again for the information. It is very helpful.

Subject: RE: Tower Standard/Haskell Lake well placement discussion-tech group

Hello Bob, the reality of the situation really dictates that the decision to install the wells in 2016 occur no later than tomorrow. I am legally bound to provide Diggers Hotline three (3) business days to complete the underground utility locate requests. I may be able to ask for an emergency locate, but it may be tough getting all utility marking crews out to the site. I also have to let my drillers know asap so they can schedule the work and make sure they are prepared for a difficult week of drilling.

What currently is in place:

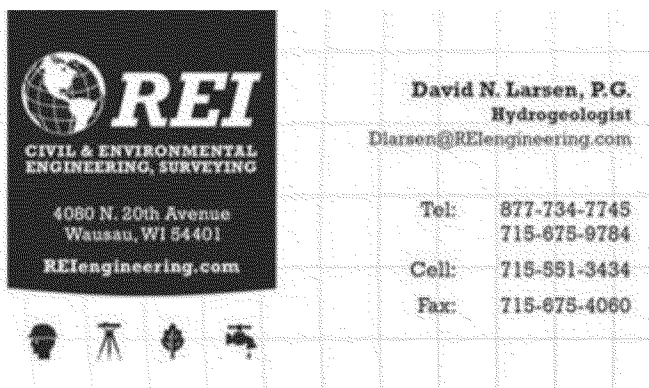

- [REDACTED] EPA and WDNR approved well locations, depths and construction methodologies
- [REDACTED] 2 drill crews willing to perform the work the week of December 12th. Drilling may take longer than 1 week to complete and will be dependent on weather and drilling conditions.
- [REDACTED] Industrial waste vendor who is willing to drop off a semi tanker to allow us to manage the significant volume liquid waste that will be generated during the mud rotary drilling method.
- [REDACTED] Approval from both Steve Yach and Lisa Sundberg to advance wells on their property.
- [REDACTED] WDNR (PECFA) input on funding the proposed well installation activities

If the well installation is to take place in 2016, a decision really needs to be completed asap. I do not want to put additional pressure on my drillers, or compromise the consultant/vendor relationship by continuing to delay. If a decision is not reached tomorrow, I would recommend cancelling the well installation.

Thank you,

David N. Larsen P.G
